## Diseño de base de base de datos

### Clase DatabaseHelper

```
public void onCreate(SQLiteDatabase db) {
    String queryCreatePetCatalogTable = "CREATE TABLE "+ DBSettings.TABLE_NAME + "(" +
        DBSettings.TABLE_CATALOG_PET_ID      + " INTEGER PRIMARY KEY AUTOINCREMENT," +
        DBSettings.TABLE_CATALOG_PET_NAME    + " TEXT," +
        DBSettings.TABLE_CATALOG_PET_LIKES   + " INTEGER," +
        DBSettings.TABLE_CATALOG_PET_DISLIKES + " INTEGER," +
        DBSettings.TABLE_CATALOG_PET_PICTURE + " INTEGER" +
        ")";
    db.execSQL(queryCreatePetCatalogTable);
}
```

### Dataset

#### Clase PetCatalog

```
private String strPetID;
private String strPetName;
private String strPetLikes;
private String strPetDisLikes;
private int intPetPicture;
```
